Jatin Thakur is a proficient Frontend Developer skilled in HTML, CSS, JavaScript, React, Tailwind CSS, Bootstrap, and Material UI. With a keen eye for design and extensive experience, he excels in crafting responsive and visually appealing web interfaces, ensuring an optimal user experience across various platforms.

Experience

frontend developer

2015 - 2017

- 07/2023 present
- E-Skills Web | Full Stack Development Mern Mean Python Web Design Training In Indore
- Eskills is an academy for design and coding established in 2018 by professionals who have significantly changed their lives by learning technological skills. Eskills specializes in bootcamps for immersive, in-person, and online training. Since our first lesson, we've grown a lot, teaching in a classroom in what used to be a computer school. Eskills now has three branches in Indore.

PERSONAL PROJECTS

2023- present

- WEATHER-APP
- To create a weather app using JavaScript and Bootstrap 5, start by designing the framework. Utilize Bootstrap's grid system for layout and components for styling. Implement JavaScript for fetching weather data from an API and displaying it dynamically. Ensure responsiveness for various devices. Focus on simplicity, usability, and aesthetic appeal.
- I-PHONE STORE
- Incorporate Redux with React to enable seamless add-to-cart functionality in the iPhone Store app. Utilize Redux state management for efficient data flow, ensuring smooth interaction between components and a streamlined shopping experience for users.
